In 2016 I specialised in Cinematography and graduated with a 1st class honours degree in Film and Television Production from The University of the Arts London. I then gained 4 years of valuable knowledge in equipment hire at Procam Take 2, learning how to utilise, maintain and repair a huge variety of equipment; as well as coordinate and run their lighting department. Also during this time I spent every possible moment lighting short form projects. Having developed a keen eye for lighting I went on to study City & Guilds qualifications, BS7909 Temporary Power Systems and 2365 Level 2 Electrical Installations. This enabled me to become a fully competent Set Lighting Electrician and led me to recent work in Television Drama and Feature films.

## Relevant Credits

My Role	DOP / Gaffer	Production	Format/Unit	Title
